

LED PAR16 5,5W/830-820 GU10 DTW BL

Change the ambiance by dimming the lamp. The more you dim the warmer the light. When the light is set to the brightest level the colour temperature is 3000K and on the lowest it is 2000K. Dimming 100 ... 10%. Dim to Warm feature resembles incandescent lamp dimming. Very natural for the eyes.
